EDUCATION

FORMAN CHRISTIAN COLLEGE UNIVERSITY

Bachelor's Of Science (BS) in
Computer Science
Graduation:2025

SKILLS

- Python
- SQL
- SDLC(understanding of software development process)
- Database design and management
- Algorithmic problem solving skills
- Troubleshooting skills

PROFESSIONAL SUMMARY

Proficient in developing Python applications and utilizing SQL for database management along with proficiency in data structures and algorithms as a Computer Science student. Solid understanding of software development principles to solve practical problems. Strong problem-solving abilities demonstrated through academic projects and coursework. Seeking opportunities to improve my abilities in dealing with large-scale software systems.

PROJECTS

- Cab Booking System:
 - Created a cab booking system for my P-2 course as a final term project.
 - Developed the project using object-oriented programming concepts.
 - Utilized all learnt concepts to ensure seamless working.
- Library Management System:
 - Created a sql based management system to maintain all the library records for my Database course.
 - Utilized Microsoft Sever Management System to implement and manage the database.
 - The system consisted of advanced functionality, including dynamic tables, to enhance information management and provide a customizable and efficient book cataloging system.
- Mentcare System:
 - Created a prototype of an advanced mentcare system as a term project for software engineering course.
 - Implemented important software engineering concepts such as SLDC.
 - Followed complete process of Software Engineering, including interviews, SRS creation, diagrams, and concluded it with comprehensive project report.
